- Macedonian (Fluent)
- Portuguese (Advanced)

PROFILE

Senior Full-Stack Software Engineer with 10+ years of experience designing and building secure, scalable applications. Specialized in React, Next.js, Node.js, Go, and cloud-native architectures, with a strong background in cybersecurity and AWS. Proven track record of mentoring developers and driving architectural decisions that improve performance, reliability, and security.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, Go, HTML, CSS
- Frameworks & Libraries: React, Next.js, Node.js, NestJS
- Cloud & DevOps: AWS, Kubernetes, Docker, Cloudflare, CI/CD
- Backend & APIs: RESTful APIs, Go microservices, GraphQL APIs
- E-Commerce Platforms: Shopify (custom apps and themes, Liquid)
- Databases: MongoDB, PostgreSQL, DynamoDB
- AI: Claude Code, Hugging Face, Copilot

WORK EXPERIENCE

Wag! Group Co. 2023 - PRESENT
Senior Software Developer

- Led development of high-performance web applications using Next.js, Node.js, and React. Mentored junior developers and guided architecture decisions, introducing DevSecOps best practices.
- Developed a full-stack geo-enabled mobile application using React Native (Expo), Supabase, and PostGIS, implementing real-time location tracking, authentication, and cloud-based data management.

PlacerWeb 2019 - 2023
Senior Software Developer

- Collaborated with cross-functional teams to deliver original and efficient software solutions.
- Refactored legacy React codebases, reducing technical debt by 15%.
- Designed and implemented Go(Golang) APIs and microservices to handle large-scale data processing and secure integrations.

EDUCATION

2005 - 2010

SS. CYRIL AND METHODIUS UNIVERSITY

- Agricultural Science
- Computer Science

Loka

2018 - 2019

Software Developer

- Collaborated with cross-functional teams to deliver original and efficient software solutions.
- Developed a React-based web application for a major laboratory chain to streamline the processing and analysis of research documents related to mRNA studies.
- Collaborated closely with scientists and research teams to translate complex bioinformatics requirements into user-friendly interfaces.
- Ensured data integrity, security, and compliance with research standards while integrating with backend APIs and laboratory information systems to accelerate research efficiency and decision-making.

Athinda Web Development

2017 - 2018

Full-Stack Software Developer

- Designed and deployed a full lifecycle application using the MERN stack.
- Built a GraphQL API with Node.js and Apollo Server.
- Delivered Shopify theme customizations and integrations for small businesses, enabling them to expand their online presence.

Devscale

2015 - 2018

Web Developer

- Collaborated with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Analyzed usability and performance issues, delivering fixes and optimizations.
- Delivered custom e-commerce solutions using Shopify, JavaScript, HTML, and CSS, ensuring optimized customer journeys and conversion rates.
